Case Statement

```
case $variable in
    pattern1)
        # Code to execute
        ;;
    pattern2)
        # Code to execute
        ;;
    *)
        # Default case
        ;;
esac
```

Example:

```
fruit="pear"

case $fruit in
    "apple")
        echo "You chose pear"
        ;;
    "banana")
        echo "You chose banana"
        ;;
    *)
        echo "Unknown fruit."
        ;;
esac
```
